ÇİMSA recently contracted JAMCEM Consulting as part of its Due Diligence team for the potential purchase of cement and aggregate assets in Western Europe. The focus of their work was on the current and future supply of raw materials to both the cement and aggregates operations of the target assets, the capital cost estimates for the opening of two new quarries as well as identifying the red flags - both operational and financial - associated with the raw materials supply.

ÇİMSA were highly satisfied with the services supplied by JAMCEM Consulting and the high quality of the report that was provided and would highly recommend JAMCEM Consulting to other either cement industry or financial institutions engaging in Due Diligence assessments.
