TO WHOM IT MAY CONCERN

JAMCEM Consulting has undertaken work for the EBRD in reviewing Technical & Feasibility studies for Cement Plants and conducting Energy Efficiency Audits for Cement Plants. The work has been completed successfully, displaying a high level of professionalism in engaging with our clients. The results have been presented in a very comprehensive and clear manner in line with objectives of the assignments and have yielded financially attractive investments. The level of technical competence is at the highest level, providing technically sound advice based on their knowledge and many years of experience in the Cement Industry.

Considering their excellent track record with us we strongly recommend them for similar assignments and projects.

Dimitris Koufos

Principal Engineer

Energy Efficiency & Climate Change
